PROJECT ENGINEER

experienced Civil Engineer with a strong background in interior design project coordination and site management. With over Four years of proven experience,

I specialize in overseeing the implementation of complex interior design projects from concept to completion.

I excel in managing on-site activities, ensuring quality standards, and maintaining timelines and budgets, while effectively coordinating with clients, designers, contractors, and project teams.

Proficient in Auto-CAD, Revit, and project management software, I have a keen eye for detail and a commitment to delivering high-quality interior design solutions. Skilled in obtaining necessary licenses and approvals from authorities like DDA, DM, Nakheel, and Trakhees, seeking to apply project management expertise effectively

KEY COMPETENCIES

- | | | |
|---------------------------|---------------------------|----------------------------------|
| • Project management | • Inspections | • Technical Drawings |
| • Problem Resolution | • Construction management | • Critical design review |
| • Client relationships | • Planning and Deployment | • Proficient in [AutoCad / Etabs |
| • Subcontractor Oversight | • Engineering | Archicad / Revit /Safe] |

PROFESSIONAL EXPERIENCE

Main Crete Building Contracting

January 2023 - Current

Project Engineer | Project Coordinator

Accomplishments:

Managing on-site execution of various interior design projects, ensuring that all work adheres to the design specifications and quality standards. I worked closely with clients, architects, and contractors to bring design concepts to life, addressing any challenges or deviations as they arose. Throughout each project, I conducted regular site inspections and quality checks to ensure the workmanship aligned with the expected design and aesthetic requirements. As the primary point of contact for clients during the project execution phase, I provided consistent progress updates while effectively managing expectations. I was also responsible for reviewing and coordinating shop drawings, ensuring they met project specifications, building codes, and industry standards. Additionally, I oversaw material submittal to ensure that the chosen materials met the required performance, aesthetic, and budgetary guidelines. Regular progress meetings were conducted to resolve any issues, maintain team alignment, and ensure that project time lines and budgets were adhered to

Main Crete Building Contracting

March 2021 - January 2023

Civil Site Engineer

Accomplishments:

responsible for coordinating closely with architects, subcontractors, and suppliers to ensure that project milestones were achieved within both budget and time line constraints. I regularly conducted site inspections to monitor progress, identify potential issues, and ensure full compliance with safety and quality standards. Additionally, I prepared and reviewed essential project documentation, such as drawings, specifications, and progress reports. In this role, I also resolved technical issues that arose on-site and provided guidance to personnel, ensuring smooth and efficient project execution. Maintaining strong communication with clients and stakeholders was a key part of my responsibilities, as I addressed concerns, provided updates, and worked to ensure overall customer satisfaction.
